

Health Center

The AUA Health Center addresses primary health care needs of the students, faculty, staff and visitors and provides medical care related to first aid.

The health center is managed by a nurse who provides nursing care on campus. The nurse evaluates the presented case, and if it requires broader medical attention, he/she advises to seek further medical care. A small limited amount of over-the-counter medications is kept in the Health Center inventory for immediate use. There are no financial charges for services within the clinic.

Any health or insurance related inquiries should be sent to AUA Health Insurance Coordinator by email: healthclinic@aua.am.

In compliance with Armenian law, AUA requires that Freshman students submit a medical document completed by a medical professional before the start of classes. Citizens of Armenia may obtain this medical document from their local polyclinic following a physical examination. International students should see a medical professional to get a written statement that includes the information noted in the International Medical Fitness Form. A link to each form is listed below.

- [Medical Form for Students age 18 and above](#)
- [Medical Form for Students under the age of 18](#)
- [International Medical Fitness Form](#)

All the inquiries related to medical documents should be sent to healthclinic@aua.am. If a student does not submit a complete and accurate medical document, they will not be permitted to register for or attend classes and a hold will be put on their account. A medical document needs to be submitted before the start of the second year of studies as well.

~~The clinic specializes in health promotion education, minor acute care, and emergent care for AUA faculty, staff, and students. A Nurse will assist with health-related issues. Appointments may be scheduled with the physician through the Health Center Nurse. If medications are needed, a prescription may be provided for the patient to purchase at local drugstores. At the same time, some over-the-counter medications are maintained in the Health Center. A list of local medical facilities is maintained for those who need referrals for chronic or serious illnesses including those comfortable managing nationalities used to western medical care.~~

~~Home visits are not within the usual scope of the Health Center staff. There may be unusual situations after hours in which the nurse or physician may visit a home with the approval of the patient. An example when this might occur is when a potential emergency situation confronts a foreign visitor or faculty member who is unfamiliar with the language or local medical infrastructure. In addition, the AUAF Administration may request a home visit with permission of the patient and concurrence by the clinical staff. Department heads are encouraged to inform the Health Center staff about an employee's potentially serious illness to enable them to contact the employee to find out whether he/she needs medical support.~~

Revised on 07.09.2021

First adopted on 01.01.2006

~~There are recommended procedures to obtain assistance should a medical accident occur within the building. Telephone numbers for after hours care and emergencies are widely distributed among the security guards, employees, and AUA Health Center bulletin boards and office door. The AUA complies with local regulations regarding liabilities.~~
